## Summary

- I am a master's graduate in Information Technology, majoring in Software Development and Support, with two internship experiences and five side projects focusing on full-stack development using **React** and **C#**. I have hands-on experience building interactive and responsive user interfaces while ensuring strong user experience and performance. As a fast learner, I am eager to explore new technologies and value constructive feedback to continuously improve my skills. I aim to grow as a full stack developer and contribute to real-world projects that make a practical impact.

## Experience

- New Beginnings** | Front-End Intern | Jun 2024 – Aug 2024  
**Tech Stack:** React Native, UX/UI Design, Responsive Layout Design  
Developed a mobile learning app for the Youth Marine Conservation Program, helping students complete Level 1 certification through interactive modules and quizzes.
- Cinefly** | Front-End Intern | Jun 2024 – Aug 2024  
**Tech Stack:** React, TypeScript, Redux, CSS, Storybook, Jira  
Focused on responsive UI design, tag management interface, and director's guide layout. Conducted acceptance testing and implemented media queries to ensure cross-device consistency.

## Education

- Software Development and Support, GRIFFITH UNIVERSITY (2023–2024)
- Human Development, TZU CHI UNIVERSITY (2010–2014)

## Side Project

- Instagram Project:** Developed a responsive Instagram-style UI using React and Chakra UI, featuring profile view, post grid, and navigation bar.
- Photo Gallery App:** Built a responsive image gallery with React, TypeScript, and the Unsplash API, including search functionality and infinite scrolling.
- Portfolio Website:** Created a personal portfolio using React, HTML/CSS, and JavaScript to showcase projects and experience with a modern, responsive design.
- Shopping Cart App:** Implemented a full-featured shopping application using React Native, Redux, and AsyncStorage, supporting cart management and order tracking.
- FinShark:** Designed a .NET Core and C# API that fetches and analyzes stock data, focusing on backend API integration and data visualization.
- Amount2Words:** Built a C# ASP.NET MVC web application converting numeric currency values to English words, featuring clear UI, validation, and unit testing.

## Skills

- Programming Languages: C#, HTML, CSS, JavaScript, TypeScript, Python
- Frameworks & Libraries: .NET, React, Redux, Express, jQuery
- Databases: MySQL
- Cloud & DevOps: Azure, CI/CD Pipelines, Git
- Testing & Quality Assurance: Jest, Unit Testing
- Languages: English, Mandarin

## Certificates

- AWS Certified Cloud Practitioner
- freeCodeCamp Front-End Development Libraries Certificate
