EDUCATION

Software Development and Support

GRIFFITH UNIVERSITY, Australia

2023-2024

Human Development

TZU CHI UNIVERSITY, Taiwan

2010-2014

CERTIFICANT

What is Software Development?

- Issuing Organization: Simplilearn
- Date Issued: 29th May 2024
- Certificate Code: 6251086

PROFILE

I am a master's student specializing in software development and support, with a robust background in web development and application design. My academic and professional journey has equipped me with extensive experience in website creation, application development, database management, and version control using GitHub. I excel in project management with tools like Trello, ensuring that all projects are delivered on time and meet high-quality standards

PROJECTS

shopping platform

Mar2024-June2024

Mobile Application (React Native)

gitHub: <https://github.com/ChienHuang0818/FakeStore->

- High Performance: Utilizing React Native's hot reload feature and optimized performance to provide a smooth user experience.
- Modern Design: The application follows the latest UI/UX design principles, with a beautiful and easy-to-navigate interface, enhancing user satisfaction.
- Real-Time Data Synchronization: Implementing real-time data synchronization to ensure that the user's shopping cart and order status are updated immediately.

Image Search Application (React)

Dec2023-Feb2024

- Engineered a responsive image search platform using React
- Implementing features like real-time search, API integration with Unsplash

Portfolio Website (React)

Sep2023-Oct2023

- Designed and deployed a professional portfolio website utilizing React,
- Showcasing my web development projects, skills, and achievements.

Weather Application (Swift)

July2023-Aug2023

- Created a mobile weather application using Swift for iOS devices,
- Offering real-time weather updates, forecast predictions, and a sleek, intuitive design.

Flask Python Website

June2023-July2023

- Developed a dynamic web application using Flask and Python,
- Featuring user authentication, database integration
- RESTful APIs to provide a seamless user experience.
